Pridex Kitchens can help make your dreams become a reality with a kitchen that looks great, and really works. We're here to make your decisions easier and your choices simpler. No more comparisons or anxiety over designs, colours, sinks or bench tops.

Pridex has been in the business of manufacturing kitchens since 1982. That's more than twenty years of experience, and during that time we've built hundreds of kitchens.

Another reason is we only make new kitchens. This allows us to completely focus on helping you realise your dreams. Within the team at Pridex we have many years of experience designing and manufacturing kitchens.

A

As you know buying a kitchen isn't like shopping for a new dress, TV or home appliance. You don't walk into a showroom and pick out a kitchen to install that afternoon.

There are many choices to be made... such as colour, design, products and materials, while at the same time keeping within your budget.

At Pridex Kitchens we know the best ways to make your kitchen a hassle free reality.

Before we even put pen to paper we need to get a feel, for what you, our customer, wants to achieve in your new kitchen. This is often best established in your home, if renovating. Or alternatively in our showroom, if building, working from your new house plans.

Then, with your help, the consultant will work out the requirements for your new Pridex kitchen. We will design a practical and functional kitchen for your home.

Having established a kitchen layout we will then prepare you a written quotation. Different materials and products for example will effect the final price. The quote can include a variety of pricing options. As discussed with our consultant during the design process.
